

CITY OF MASON BEGINS CRITICAL WATER CONSERVATION PLAN

The public water system of the City of Mason has reached a Critical, Level 2 condition recently, and the City Administrator John Palacio has implemented additional water conservation measures. While we do not fear immediate water shortages, we feel it is necessary to move to Mandatory measures to protect the water levels for everyone and the increase demand of the limitations of our water system. As the hot summer winds continue to blow and the dry conditions only worsen, the City of Mason will now begin to start looking at water conservation measures throughout the community. All even numbered houses can water **twice a week** either on Monday, Wednesday, or Friday and all odd numbered houses can water **twice a week** either on Tuesday, Thursday, or Saturday we will limit each water customer to watering only **twice a week** and only between the hours of **7:00 pm and 10:00 am**, or hand watering at other times

We hope that everyone will cooperate and limit all non-essential water use. We will begin immediately to monitor water use and will issue door hanger warnings and Citations for unnecessary water uses as well as water sprinklers running during the heat of the day. Beginning August 6, 2018, we will shift to mandatory stage 2 of our City of Mason water contingency plan and water will be limited to **Twice per week** watering from between **7:00 pm and 10:00 am** and for other non-essential water use or waste. Your grass and plantings may suffer a little, but we are most concerned to protect the water supply for the critical daily needs of our residents, not just the wants of a few. As we try to protect the health and safety of our town, we hope that you will help and know that GOD will soon bless with rain so that might limit this current drought like conditions.
